Your interest in the college infrastructure, course, distance from your place, availability of hostel, fees, stipend etc may be some of the issues to guide your choices of options and advice of your parents. As it will save your time and minimize your chance of making mistake in option entry on the online option entry form. **A candidate can enter any number of options through Online (Internet) of his choice of College / Colleges and courses/subjects in the order of the priority he / she desires on his / her own arrangement. --

Options recorded in the server on the last day and time of the notified schedule in each round will be frozen and only the frozen options will be considered for allotment of seats. The candidates are advised to take a print out of the option entered by them, after the last date and time for entry of options is over.

Very Important: The candidates are advised to enter all the options which they are intending to select the seats. The candidates have to enter the priority numbers for all the colleges and courses as the seat matrix may include in the subsequent rounds i.e. by way of surrendering seats pertaining to all India quota, newly sanctioned seats, newly added colleges/courses etc. For e.g.: In X college the course “Y” is not included in the seat matrix but the provision to obtain priority of options will be enabled so that in future the competent authority accords permission then the course “Y” will be allotted only when the options of candidate are available. Therefore the Government is informing the candidates to enter all such options if they are interested to join.

Preparatory work at home:

Allotment of seats depends entirely on the priority of options given by the candidates as per the merit / rank. Hence it is of utmost importance to familiarize oneself with the operation of the computer, the locking of seats so that the correct choice and options are entered. Practice of entering of options has to be undertaken as even an expert in computers would require a minimum of one hour for entry of about 500 options. Familiarity with the computer, prior knowledge of the college, course is essential to fill up options. Even a small mistake in entering the options may deprive a valuable seat in the desired college / course even though he / she is eligible for that seat as per his / her rank. Therefore, KEA suggests that the student should familiarize themselves in entering the options in the online option entry form. A home work of about an hour everyday is necessary for the students to familiarize themselves with the allotment. The following steps may be taken by the candidates before entering their options in the online option entry form.

- The candidate should note the name of the college, the course offered in a separate sheet of paper.
- Preparatory work should be commenced only after asserting their merit / rank order.
- The priority of options among the colleges/subjects selected should be noted down.
- A mock allotment on real time data given by the candidates will also be done before the actual commencement of the First Round allotment, so that the candidate can know the college and course allotted as per his options. The candidate can also change his options after seeing the mock allotment. This will help him to find out his standing as per his merit and as per options. **The mock test is only to help the candidates familiarize and show them the course and college allotted to them and it should be in no way presumed that the same seat and college will be allotted to them in the actual allotment of seats.** Because, the candidates have the option of changing the priority of the options entered by them after the mock allotment.
- The verification Acknowledgement issued to the candidates indicates the category which he / she belongs, rank number for each discipline to which he / she eligible, special category if any etc. It will help in choosing the college or course or place of the college.

The entire process of allotment is controlled by sophisticated software and high end computers which examine minutely the options given by the candidates for allotment of the best possible seat to the candidate as per the rank and options given. Therefore, it is very important that the candidate should be very clear about the choice of the course, college and subject which he is interested in. For example if a candidate is interested only in Master degree Pediatric seats then he can give all the options in all the colleges for allotment of Pediatric seats only. There may be about 38 Medical colleges and the candidates can give 38 options for that course if the course is available in all colleges. The computer will decide the best seat available for allotment as per the rank and order of options of the candidate. Similarly a candidate may be interested only in orthopedics and he may opt for aorthopedics course in a particular college as per his choice. The computer will pick up the best options available as per merit and order of options. In other words the candidate is free to give as many options in as many courses in as many colleges as he deems fit. The more number of options the better it is for the candidate to secure a seat of his choice.

NOTE: Candidates are advised not to start entering the options directly on the online option form on the internet without preparatory work at home on choice of options, as it leads to commission of mistakes / wrong entries / wrong order of preferences.

NOTE: Please ensure that whether you are entering the options for Masters Course or Diploma course in the subject of your choice before entering options. Don't repent later.

The candidates are advised to gather information about the colleges, the courses offered, infrastructure available, teaching faculty, laboratory facilities, hostel facilities and any other information which would help him / her in narrowing his options. The distance from his / her house, the mode of transport, the hostel facilities and the environment etc are also prime factors in deciding priority of options.

The whole process of seat allotment hinges on the priority of options entered by the candidate. If option entry is faulty then the candidate stands a chance of losing best available seat as per his rank and category. The candidate is advised to take utmost care while entering priorities for college, course and subject.

Instructions and guidelines to be followed by candidates for online allotment of seats.

- Karnataka Examinations Authority is conducting online seat allotment by obtaining the options from NBE Rank holders for admission to Medical and Dental Postgraduate courses for both in-service and non in-service quota seats. **Seats will be allotted based on the merit, priority of options entered by the candidates and subject to the availability of seats in his/her respective category.**
- For the online seat allotment process, NIC, Karnataka along with KEA has worked out simple user friendly software to make your experience of choosing a professional college and course as simple and convenient as possible. This helps you to navigate through the entire process of accessing the seat allotment, keying in your options in order of priority, securing an allotment of seat, and finally joining the college of your choice. The KEA will receive the seat matrix from the Government before the commencement of allotment of seats in the First Round. Hence, an accurate number of seats to be available for allotment as Government quota seats, college wise, category wise, course wise and subject wise cannot be made known at this stage. The seat matrix (Government quota seats) in respect of Medical and Dental courses, as notified by the Government will be published on the KEA Website <http://kea.kar.nic.in> before the commencement of allotment of seats to the

respective disciplines. For the benefit of candidates, complete list of colleges and subjects has been provided in **Annexure-VIII** and further details can be obtained from Medical/Dental Council of India website. This is only for the information of the candidates and further details will be provided in the seat matrix.

VI Entry of Options by Candidates:

(i) Entry of options by the candidates will begin only after the receipt of seat matrix from the Government. The details of College, Course, Subject, Category and discipline available for allotment will be published on the KEA website <http://kea.kar.nic.in> which can be downloaded and printed.

(ii) The candidate who becomes eligible after verification will only be considered for entry of options. The candidate may enter the course / college of his choice from among the seats available which is displayed at the time of entry of options i.e., discipline wise (Medical/Dental), course wise (Masters/Diploma), college wise and subject wise . **The candidate will have the choice to enter all the options in the discipline to which he/she is eligible irrespective of the availability of seats. The option entry will be only once for all online seat allotment rounds. Candidates are required to note that there could be seat surrenders from All India Quota after the All India Quota last round as well as new approvals for additional intake and new courses approval in colleges.** Therefore all the candidates are required to enter all possible options as the OPTION ENTRY IS ONLY A ONE TIME PROCESS. Further the last date for approval of additional seats and courses by MCI is 15th April. A list of such anticipated approvals shall also be put up on the KEA website. This is only by way of additional information to the Candidates. No claim can be exercised by any Candidate in the eventuality of non-approval. Candidates are required to keep all this in mind while listing out their options in order of priority during Option Entry.

Candidate can enter the options for one of the discipline for which he/she is eligible. Upon entry of preliminary information by the candidate on the internet at the specified URL, the option entry form will be displayed. (Candidate has to enter his User ID/PGET No., valid Secret key and password coined by the candidate.) The entry form contains priority order number, discipline, college name, college code ,course code and the subject code. The candidate has to give the priority order number from among the list of colleges and courses. Candidate can prioritize his/her options from series of permutation/combination of college and course.

There is no limit for entry of options. A Candidate can enter any number of options as he / she wishes to exercise on his / her own priority. Candidates are advised to enter more number of options to avoid any disappointment of not securing a seat. Candidate has to enter the option in the order of priority as he / she desires. Candidates are advised to do thorough home assignment regarding the choices which they want to exercise, the college which they prefer, the course which they are interested to join etc. It is better to write the order of options on a sheet of white paper and discuss the same with your parents / guardians / mentors etc before actually entering same in the system. Your interest in the college infrastructure, course, distance from your place, availability of hostel, fees, stipend etc may be some of the issues to guide your choices of options and advice of your parents. As it will save your time and minimize your chance of making mistake in option entry on the online option entry form. **A candidate can enter any number of options through Online (Internet) of his choice of College / Colleges and courses/subjects in the order of the priority he / she desires on his / her own arrangement. Schedule for Entry of options will be notified by KEA on the website <http://kea.kar.nic.in> & other media, SMS on the registered mobile number at the time of application if required. The allotment will not proceed to the next rank candidate till the list of your options is completely searched for availability of a seat. The candidate may change the options as many times as he / she desires before the last date and time notified for entry of options. After entry of options candidate has to select the button submit and logout.**

It is the endeavor of the State Government to get as many seats as possible for Government quota in private institutions. Candidates are encouraged to enter as many options as possible in order of as only one time option entry is allowed.

Options recorded in the server on the last day and time of the notified schedule in each round will be frozen and only the frozen options will be considered for allotment of seats. The candidates are advised to take a print out of the option entered by them, after the last date and time for entry of options is over.

Very Important: The candidates are advised to enter all the options which they are intending to select the seats. The candidates have to enter the priority numbers for all the colleges and courses as the seat matrix may include in the subsequent rounds i.e. by way of surrendering seats pertaining to all India quota, newly sanctioned seats, newly added colleges/courses etc. For e.g.: In X college the course "Y" is not included in the seat matrix but the provision to obtain priority of options will be enabled so that in future the competent authority accords permission then the course "Y" will be allotted only when the options of candidate are available. Therefore the Government is informing the candidates to enter all such options if they are interested to join.

(iii) Please enter URL or Website address <http://kea.kar.nic.in> or as indicated in the notification. Upon entry of URL you will find link like **"PGET-2015-OPTION ENTRY"** and select the links regarding the information on many items.

Note: Candidates should compulsorily register using User ID and Secret Key and execute the option entry. If the candidate has either not registered or registered but not executed Option entry he/she will not be considered in further process of online seat allotment rounds.

Preparatory work at home:

Allotment of seats depends entirely on the **priority of options** given by the candidates as per the merit / rank. Hence it is of utmost importance to familiarize oneself with the operation of the computer, the locking of seats so that the correct choice and options are entered. Practice of entering of options has to be undertaken as even an expert in computers would require a minimum of one hour for entry of about 500 options. Familiarity with the computer, prior knowledge of the college, course is essential to fill up options. Even a small mistake in entering the options may deprive a valuable seat in the desired college / course even though he / she is eligible for that seat as per his / her rank. Therefore, KEA suggests that the student should

familiarize themselves in entering the options in the online option entry form. A home work of about an hour everyday is necessary for the students to familiarize themselves with the allotment. The following steps may be taken by the candidates before entering their options in the online option entry form.

- The candidate should note the name of the college, the course offered in a separate sheet of paper.
- Preparatory work should be commenced only after asserting their merit / rank order.
- The priority of options among the colleges/subjects selected should be noted down.
- A mock allotment on real time data given by the candidates will also be done before the actual commencement of the First Round allotment, so that the candidate can know the college and course allotted as per his options. The candidate can also change his options after seeing the mock allotment. This will help him to find out his standing as per his merit and as per options. **The mock test is only to help the candidates familiarize and show them the course and college allotted to them and it should be in no way presumed that the same seat and college will be allotted to them in the actual allotment of seats.** Because, the candidates have the option of changing the priority of the options entered by them after the mock allotment.
- The verification Acknowledgement issued to the candidates indicates the category which he / she belongs, rank number for each discipline to which he / she eligible, special category if any etc. It will help in choosing the college or course or place of the college.

The entire process of allotment is controlled by sophisticated software and high end computers which examine minutely the options given by the candidates for allotment of the best possible seat to the candidate as per the rank and options given. Therefore, it is very important that the candidate should be very clear about the choice of the course, college and subject which he is interested in. For example if a candidate is interested only in Master degree Pediatric seats then he can give all the options in all the colleges for allotment of Pediatric seats only. There may be about 38 Medical colleges and the candidates can give 38 options for that course if the course is available in all colleges. The computer will decide the best seat available for allotment as per the rank and order of options of the candidate. Similarly a candidate may be

interested only in orthopedics and he may opt for aorthopedics course in a particular college as per his choice. The computer will pick up the best options available as per merit and order of options. In other words the candidate is free to give as many options in as many courses in as many colleges as he deems fit. The more number of options the better it is for the candidate to secure a seat of his choice.

NOTE: Candidates are advised not to start entering the options directly on the online option form on the internet without preparatory work at home on choice of options, as it leads to commission of mistakes / wrong entries / wrong order of preferences.

NOTE: Please ensure that whether you are entering the options for Masters Course or Diploma course in the subject of your choice before entering options. Don't repeat later.

The candidates are advised to gather information about the colleges, the courses offered, infrastructure available, teaching faculty, laboratory facilities, hostel facilities and any other information which would help him / her in narrowing his options. The distance from his / her house, the mode of transport, the hostel facilities and the environment etc are also prime factors in deciding priority of options.

The whole process of seat allotment hinges on the priority of options entered by the candidate. If option entry is faulty then the candidate stands a chance of losing best available seat as per his rank and category. The candidate is advised to take utmost care while entering priorities for college, course and subject.

This process will be done by the computer system without any further confirmation from the candidate. Also it is not possible for the candidate to retain the first round allotted seat even if/she desires to do so. If no new or better seat is allotted as per the better option of the candidate in the second round, then the already allotted seat i.e. First round allotted seat will be with the candidate which will not be disturbed. Hence it is very important to prioritize your options carefully after thorough analysis.
- Please note that if any seat gets allotted in this round as per merit and options entered before the first round by the candidate, **there is no chance of getting back the earlier allotted seat.**
- Candidates are advised to enter all the options they want to select whether the seats shown in the seat matrix or not, only for the reason that consequential vacancies may arise during allotment process and the candidates will have a chance of getting a better seat if they have entered the options.

NOTE: Consequential vacancies that arise after their turn cannot be claimed and consequential vacancies of other discipline which arises due to allotment will not be offered.

- If the candidate does not get any seat in this round then the seat allotted to him / her in the earlier round if any stands confirmed.
- All candidates who have been allotted afresh in this round should compulsorily join the colleges after making payment and collecting admission order at KEA and report to KEA portal for confirmation otherwise seat gets cancelled.

- The fee paid by the candidates in the earlier round if any, will be adjusted upon allotment of a seat in this round.
- If any candidate gets a better option seat in this round, the earlier allotted seat will be added to seat matrix pool of the same category immediately and the same seat will be made available for the next rank number candidate.

Additional Detailed explanation for “Non-interactive online seat allotment process”

Option Entry

Candidates can enter the options of multiple disciplines like Medical, Engineering, ISM&H and Architecture, Farm Science, B-Pharm, Pharm-D, etc., together in the order of priority as per their eligibility.

Allotment Procedure

The allotment of a seat for a particular student is based on his/her rank, entered options and availability of seat as per his/her option entered. The detail procedure adopted in the software is given below.

Round : once the document verification is over students are asked to make entry of options. Each option entry has a start date and closing date this is followed by an allotment. The students are asked to entry fresh options multiple times if they are not satisfied of allotment. Each fresh option schedule defines a new round.

Iteration : in each round there is an internal process called iteration. Iteration means trying all the options of the students repeatedly more than once for each stream viz Medical, ISM&H, Engineering and Architecture, Farm Science, B-Pharm, Pharm-D, etc., During the iterations system tries to allot best option to students without asking fresh options. The iteration cycle is as follows.

- | | | | |
|-----------------|------------|----------------|-----------------|
| a) Medical | b) ISM & H | c) Engineering | d) Architecture |
| e) Farm Science | f) B-Pharm | g) Pharm-D | |

One cycle of allotment from 'a' to 'g' mentioned above constitutes one iteration. For detailed explanation please refer page 73 to 78.

Preparatory work at home:

Allotment of seats depends entirely on the priority of options given by the candidates as per the merit / rank. Hence it is of utmost importance to familiarize oneself with the operation of the computer, the locking of seats so that the correct choice and options are entered. Practice of entering of options has to be undertaken as even an expert in computers would require a minimum of half an hour for entry of about 100 options. Familiarity with the computer, prior knowledge of the college, course is essential to fill up options. Even a small mistake in entering the options may deprive a valuable seat in the desired college / course even though he / she is eligible for that seat as per his / her rank. Therefore, KEA suggests that the student should familiarize themselves in entering the options in the online option entry form. A home work of about an hour everyday is necessary for the students to familiarize themselves with the allotment. The following steps may be taken by the candidates before entering their options in the online option entry form.

- The candidate should note the name of the college, the course offered in a separate sheet of paper.
- Preparatory work should be commenced only after asserting their merit / rank order.

- The priority of options among the colleges/courses selected should be noted down.
- A mock allotment on real time data given by the candidates will also be done before the actual commencement of the First Round allotment, so that the candidate can know the college and course allotted as per his options. The candidate can also change his options after seeing the mock allotment. This will help him to find out his standing as per his merit and as per options. **The mock test is only to help the candidates familiarize and show them the course and college allotted to them and it should be in no way presumed that the same seat and college will be allotted to them in the actual allotment of seats.** Because, the candidates have the option of changing the priority of the options entered by them after the mock allotment.
- The verification Acknowledgement issued to the candidates indicates the category which he / she belongs, rank number he / she eligible, special category if any etc. It will help in choosing the college or course or place of the college.

The entire process of allotment is controlled by sophisticated software and high end computers which examine minutely the options given by the candidates for allotment of the best possible seat to the candidate as per the rank and options given. Therefore, it is very important that the candidate should be very clear about the choice of the course, college and subject which he is interested in. For example if a candidate is interested only in Medical seats then he can give all the options in all the colleges for allotment of Medical seats only. There may be about 38 Medical colleges and the candidates can give 38 options in all colleges if interested. The computer will decide the best seat available for allotment as per the rank and order of options of the candidate. Similarly a candidate may be interested only in Dental and he may opt for Dental college as per his choice. The computer will pick up the best options available as per merit and order of options. In other words the candidate is free to give as many options in as many courses in as many colleges as he deems fit. The more number of options the better it is for the candidate to secure a seat of his choice.

NOTE: Candidates are advised not to start entering the options directly on the online option form on the internet without preparatory work at home on choice of options, as it leads to commission of mistakes / wrong entries / wrong order of preferences.

NOTE: Please ensure that whether you are entering the options for Medical or Dental course in the college of your choice before entering options. Don't repent later.

The candidates are advised to gather information about the colleges, the courses offered, infrastructure available, teaching faculty, laboratory facilities, hostel facilities and any other information which would help him / her in narrowing his options. The distance from his / her house, the mode of transport, the hostel facilities and the environment etc are also prime factors in deciding priority of options.

The whole process of seat allotment hinges on the priority of options entered by the candidate. If option entry is faulty then the candidate stands a chance of losing best available seat as per his rank and category. The candidate is advised to take utmost care while entering priorities for college, course and subject.

NOTE ON MOCK ALLOTMENT

After the entry of options are completed, based on the options entered by the candidates in the order of merit and by following the Roster System MOCK SEAT ALLOTMENT will be carried out as per the procedures explained in this Brochure. This Mock Seat Allotment is only an INDICATIVE seat status which candidate may or may not get in the real allotment. It will help the candidate to revise, update, add or delete already the entered options.

Candidates are required to verify their allotted seat status on the KEA Website <http://kea.kar.nic.in>, if they desire they are free to change, reorder, delete and add to their choices of courses / colleges as per their preference. All the candidates must enter their final options before **the last date prescribed**. Candidates will not be able to change their options after the last date and time fixed to do so. Even though the candidate may not like to modify the options after the Mock Allotment, he / she may not get the same seat during the Real Allotment as other candidates may change their earlier entered options.

Access to mock result will be enabled to the candidates. Candidates can enter their CET Number to know their mock result. It will be hosted on the website <http://kea.kar.nic.in>. Candidates will also be able to view the details of seat allotted as per their options priority. Candidates can also view the College-wise, Course-wise, Category-wise cut off rank of Mock Allotment. Candidates, who have not been allotted any seat in the Mock allotment, should verify the options entered by them and are advised to enter more options in which they are interested.

This is only an indicative exercise, candidates need not report to the college, but should wait for the real allotment result. However, ALL CANDIDATES CAN CONTINUE TO ACCESS THEIR LOGIN ACCOUNTS TO UPDATE/ ADD/DELETE/ GIVE FRESH OPTIONS TILL THE LAST DATE AND TIME FOR OPTION ENTRY FOR REAL ALLOTMENT.

WHY DO WE CONDUCT MOCK ALLOTMENT?

Based on the Mock Allotment a candidate can get an indicative allotment of college / course / stream as per his / her priority of options. This gives a clear idea to the candidate to change or retain the entered options. Candidates can get to know that the other candidate with lower merit is allotted a seat which he / she

was eligible but for his / her not entering that option. Therefore, candidates will be given one more chance to change the priority of options or deletion or addition or re-ordering of the options.

Due to change in the options by candidates after Mock Allotment, one may not get the same seat in the real allotment as was allotted in the mock allotment.

PROCESS OF ALLOTMENT OF SEATS AND ADMISSION and POST SEAT ALLOTMENT PROCEDURE – CHOICES BEFORE A CANDIDATE

The seat matrix issued by the Government for each discipline will be adopted for allotment seats. College wise, course wise and category wise seat matrix issued by Government will be hosted on the KEA website for the information of the candidates and parents.

FLOW CHART FOR FIRST ROUND

1st Phase of allotment:

1 st Phase	:	i) Allotment of seats to all the disciplines as per the seat matrix issued by the Government. (a) Physically Disabled candidates (b) NCC candidates (c) Sports Candidates ii) Allotment of seats to Medical / Dental
-----------------------	---	--

Based on the merit and priority of options the first phase of allotment begins. The computer will first allot the seats in the above mentioned order and continues in the same order. While

allotting the seats in the 1st Phase at any stage, the seat allotted if any, will automatically get cancelled upon allotment of a seat in the subsequent discipline and such cancelled seat will be considered for allotment of a seat in the next iteration.

Therefore, multiple iterations may take place in the 1st Phase. The computer will stop the allotment only if the last seat is allotted or when it reaches the last rank in each discipline. That means the candidates will always be climbing upwards both in options and in roster. The order of allotment as shown above will get repeated in the 1st phase until there is no change in the allotment of any candidate.

2nd Phase of allotment.

After allotment of seats in the first phase, action will be taken to allot the seats for the 2nd phase allotment of seats. After completion of the 1st Phase of allotment of seats, the seats that remain unfilled under all the Rural and Kannada medium quota of the reserved categories will be converted to General of the respective reserved categories (SCR & SCK to SCG, STR & STK to STG, 1R & 1K to 1G, 2AR & 2AK to 2AG, 2BR & 2BK to 2BG, 3AR & 3AK to 3AG, 3BR & 3BK to 3BG) before the commencement of 2nd Phase and offered ONLY to the reserved category candidates including GMR & GMK category candidates. Consequential vacancies which arise during this allotment of seats will remain in the same category and will be offered to the same reserved category candidates.

In this phase only reserved category candidates will be considered for allotment and GM candidates will not be considered. Further, GM and SNQ seats will also be not considered for allotment of seats.

IMPORTANT:

This procedure for conversion of seats will be adopted before the commencement of 2nd Phase of allotment. Further, if the reserved category candidates are allotted with a General Merit / respective reserved category seat during the 2nd phase of allotment, then a reserved category seat becomes vacant. Such seats are treated as 'CONSEQUENTIAL VACANCIES'. These consequential reserved category vacancies that arise during the 2nd phase of allotment will remain under the same categories and will be offered only to the candidates belonging to the same reserved categories.

NOTE: All GM consequential vacancies which arise in this phase will be considered for allotment in the 3rd Phase of allotment.

In this phase also, the order of seat allotment remains same which is as follows:

2 nd Phase	:	i) Allotment of seats to all the disciplines as per the seat Matrix issued by the Government. (a) Physically Disabled candidates (b) NCC candidates (c) Sports Candidates ii) Allotment of seats to Medical / Dental
-----------------------	---	--

Based on the merit and priority of options the second phase of allotment begins. The computer will first allot the seats in the above mentioned order and continues in the same order. While allotting the seats in the 2nd Phase at any stage, the seat allotted if any, will be released automatically upon allotment of a seat in the subsequent discipline and such released seat will be considered for allotment of a seat in the next iteration.

Therefore, many iterations may take place in the 2nd Phase also. The computer will stop the allotment only if the last seat is allotted or when it reaches the last rank in each discipline. That means the candidate will always be climbing upwards both in options and roster. The order of allotment as shown above will get repeated in the 2nd Phase until there is no change in the allotment of any candidate.

3rd Phase of Allotment:

After the allotment of seats in the second phase of allotment, the seats that remain unfilled under various reserved General categories such as **SCG, STG**, 1G, 2AG, 2BG, 3AG, 3BG, GMR and GMK, along with unfilled special category seats, if any, will be converted to the General Merit category and offered to GM candidates along with all other reserved category candidates in the 3rd Phase of allotment. However, the consequential Rural and Kannada medium reserved category seats that arise during the 3rd Phase of allotment and if remains un-allotted then the same seat will be converted to the General of the respective reserved categories only if there are no seats in the respective general category and will be made available for allotment only to the respective reserved category candidates during 3rd Phase of allotment.

In this round also, the order of seat allotment remains same which is as follows:

- | | | |
|-----------------------|---|--|
| 3 rd Phase | : | i) Allotment of seats to all the disciplines as per the seat Matrix issued by the Government.
(a) Physically Disabled candidates
(b) NCC candidates
(c) Sports Candidates
ii) Allotment of seats to Medical / Dental |
|-----------------------|---|--|

All the candidates will be considered for allotment of seats in this iteration. Before commencement of 3rd phase the computer will display the number of seats that got allotted in each discipline, total number of candidates allotted and the number of seats remained unfilled and number of candidates un-allotted.

While allotting the seats in the 3rd Phase at any stage, the seat allotted if any, will be automatically released upon allotment of a seat in subsequent stage and such released seat will be considered for allotment of a seat in the next iteration.

Based on the merit and priority of options the third phase of allotment begins. The computer will first allot the seats in the above mentioned order and continues in the same order. While allotting the seats in the 3rd Phase at any stage, the seat allotted if any, will be released automatically upon allotment of a seat in the subsequent discipline and such released seat will be considered for allotment of a seat in the next iteration.

Therefore, many iteration may take place in the 3rd Phase also. The computer will stop the allotment only if the last seat is allotted or when it reaches the last rank in each discipline. That means the candidate will always be climbing upwards both in options and roster. The order of allotment as shown above will get repeated in the 3rd Phase until there is no change in the allotment of any candidate

Speciality of 3rd Phase of allotment is, after completion of last stage of allotment of seats, the seats remained unallotted if any, in any reserved category will be converted to GM automatically and will be offered to all the eligible candidates from 1st to last rank based on the priority of options entered. That means repetition of phase 3 allotment process will take place. Phase 3 allotment stops only when there is no seat in reserved category and no change in the allotment.

Summary:

This illustrates that at each stage, the options are getting shrunk before moving to the next stage, if seats are allotted. If seats are not allotted, the options list remains unchanged.

The seats which are returned back to seat matrix in the process of allotment stages will be allotted to the next candidate as per rank and options. This way there will be a number of iterations till the candidate gets the best seat of his choice governed by rank. This means, the system halts allotment when no seats are available for a candidate as per his options.

All the steps taken together as detailed above will form one round and the stages mentioned above, are known as iteration stage / phase. The iteration stage in each round will go on as long as the choice of the candidate is not fulfilled or the availability seat is not exhausted. In this way each candidate may get either a Medical seat or Dental seat as per his/her rank and priority in the respective disciplines. However it is possible that if all seats are exhausted then a candidate might not be allotted a seat at all. Therefore it is very important to candidates to give their options very carefully and after considerable thought and after discussing with their parents and elders. If by chance the options given by the candidate is not well thought he may lose a seat in a good college as he may not have given option for that particular college or would have given lower options. For example a candidate is interested in college A, but by mistake or by oversight he has given a lower preference for that college and has given higher preference for some other college. The computer then will allot a seat as per his rank and as per his higher priorities. In this way he may tend to lose a seat in the college of his choice merely because he has not given a correct priority of options.

After the entire iteration of all the discipline in all the three phase is complete the final list will be announced on the website and this is known as the First Round. Therefore, many iterations may take place in one round as per the choice of the candidate and as per the availability of seats. The candidate can track down the movement of seats in the different iteration stages to satisfy himself that the best of the choices is allotted to him. Virtual tracking of the process of allotment by the computer can be viewed by the candidate after allotment. This ensures transparency in the entire allotment stage and KEA is known for its motto **Trust Through Total Transparency**. The final list of the First Round will be hosted on the website, in the Helpline Centres and individual allotment will be sent by SMS, e-mail and the candidates are requested to note the allotment of seats to them in the First Round. The candidate here has 4 choices. The choices are: -

- iv. Candidate can modify / alter / delete the priority of options from 1 to 29.
- v. If any of the options from 1 to 29 is available in the order of merit then the computer will allot the seat to that candidate and automatically the earlier allotted seat will get cancelled and added to the seat matrix and it will be offered to the next candidate below and to subsequent candidates.
- vi. If a candidate fails to get any of the options from 1 to 29 then the seat allotted to him / her in earlier round for 30th option will remain with him / her.
- vii. Always, the computer starts from option 1, so that the candidate will get the best of the best options entered by him / her. (Options 1 to Option 29)
- viii. Candidates should not claim any ignorance on allotment of seats and they should not reject the allotted seats since the seat is allotted to candidates based on the options entered by them and order of merit.
- ix. Please note that if any seat gets allotted in this round as per merit and options entered by the candidate, there is no chance of getting back the earlier allotted seat as the earlier allotted seat would have gone into the pool for further allotment, and therefore such candidates should invariably report to the colleges allotted in the second round, it would not be available any longer for the candidate.
- x. If the candidate gets a seat in the colleges entered by him / her in this round, the seat opted by him / her in this round will be confirmed and the seat held by him / her in the earlier round will get cancelled automatically.
- xi. Candidates are advised to modify / delete / re-order the options they want to select whether the seats shown in the seat matrix or not, only for the reason that consequential vacancies may arise during allotment process and the candidates will have a chance of getting a better seat if they have entered the options.

NOTE: Consequential vacancies that arise after their turn cannot be claimed.

The KEA will receive the seat matrix from the Government before the commencement of allotment of seats in the First Round. Hence, an accurate number of seats to be available for allotment as Government quota seats, college wise, category wise, course wise and subject wise cannot be made known at this stage. The seat matrix (Government quota seats) in respect of Medical and Dental courses, as notified by the Government will be published on the KEA Website <http://kea.kar.nic.in> before the commencement of allotment of seats to the respective disciplines. For the benefit of candidates, complete list of colleges and subjects has been provided in **Annexure-VIII** and further details can be obtained from Medical/Dental Council of India website. This is only for the information of the candidates and further details will be provided in the seat matrix.

VI Entry of Options by Candidates:

(i) Entry of options by the candidates will begin only after the receipt of seat matrix from the Government. The details of College, Course, Subject, Category and discipline available for allotment will be published on the KEA website <http://kea.kar.nic.in> which can be downloaded and printed.

(ii) The candidate who becomes eligible after verification will only be considered for entry of options. The candidate may enter the course / college of his choice from among the seats available which is displayed at the time of entry of options i.e., discipline wise (Medical/Dental), course wise (Masters / Diploma), college wise and subject wise. **The candidate will have the choice to enter all the options in the discipline to which he/she is eligible irrespective of the availability of seats. The option entry will be only once for all online seat allotment rounds. Candidates are required to note that there could be seat surrenders from All India Quota after the All India Quota last round as well as new approvals for additional intake and new courses approval in colleges if any.** Therefore all the candidates are required to enter all possible options as the OPTION ENTRY IS ONLY A ONE TIME PROCESS. Further the last date for approval / permission of additional seats and courses by MCI is applicable. A list of such anticipated approvals shall also be put up on the KEA website. This is only by way of additional information to the Candidates. No claim can be exercised by any Candidate in the eventuality of non-approval. Candidates are required to keep all this in mind while listing out their options in order of priority during Option Entry.

Candidate can enter the options for one of the discipline for which he/she is eligible. Upon entry of preliminary information by the candidate on the internet at the specified URL, the option entry form will be displayed. (Candidate has to enter his User ID/PGET No., valid Secret key and password coined by the candidate.) The entry form contains priority order number, discipline, college name, college code, course code and the subject code. The candidate has to give the priority order number from among the list of colleges and courses. Candidate can prioritize his / her options from series of permutation / combination of college and course.

There is no limit for entry of options. A Candidate can enter any number of options as he / she wishes to exercise on his / her own priority. Candidates are advised to enter more number of options to avoid any disappointment of not securing a seat. Candidate has to enter the option in the order of priority as he / she desires. Candidates are advised to do thorough home assignment regarding the choices which they want to exercise, the college which they prefer,

the course which they are interested to join etc. It is better to write the order of options on a sheet of white paper and discuss the same with your parents / guardians / mentors etc before actually entering same in the system. Your interest in the college infrastructure, course, distance from your place, availability of hostel, fees, stipend etc may be some of the issues to guide your choices of options and advice of your parents. As it will save your time and minimize your chance of making mistake in option entry on the online option entry form.

A candidate can enter any number of options through Online (Internet) of his choice of College / Colleges and courses/subjects in the order of the priority he / she desires on his / her own arrangement. Schedule for Entry of options will be notified by KEA on the website <http://kea.kar.nic.in> & other media, SMS on the registered mobile number at the time of application if required. The allotment will not proceed to the next rank candidate till the list of your options is completely searched for availability of a seat. The candidate may change the options as many times as he / she desires before the last date and time notified for entry of options. After entry of options candidate has to select the button submit and logout.

It is the endeavor of the State Government to get as many seats as possible for Government quota in private institutions. Candidates are encouraged to enter as many options as possible in order of as only one time option entry is allowed.

Options recorded in the server on the last day and time of the notified schedule in each round will be frozen and only the frozen options will be considered for allotment of seats. The candidates are advised to take a print out of the option entered by them, after the last date and time for entry of options is over.

Very Important: The candidates are advised to enter all the options which they are intending to select the seats. The candidates have to enter the priority numbers for all the colleges and courses as the seat matrix may include in the subsequent rounds i.e. by way of surrendering seats pertaining to all India quota, newly sanctioned seats, newly added colleges/courses etc. For e.g.: In X college the course “Y” is not included in the seat matrix but the provision to obtain priority of options will be enabled so that in future the competent authority accords permission then the course “Y” will be allotted only when the options of candidate are available. Therefore the Government is informing the candidates to enter all such options if they are interested to join.

(iii) Please enter URL or Website address <http://kea.kar.nic.in> or as indicated in the notification. Upon entry of URL you will find link like “**PGET-2017-OPTION ENTRY**” and select the links regarding the information on many items.

Note: Candidates should compulsorily register using User ID and Secret Key and execute the option entry. If the candidate has either not registered or registered but not executed Option entry he/she will not be considered in further process of online seat allotment rounds.

- A mock allotment on real time data given by the candidates will also be done before the actual commencement of the First Round allotment, so that the candidate can know the college and course allotted as per his options. The candidate can also change his options after seeing the mock allotment. This will help him to find out his standing as per his merit and as per options. **The mock test is only to help the candidates familiarize and show them the course and college allotted to them and it should be in no way presumed that the same seat and college will be allotted to them in the actual allotment of seats.** Because, the candidates have the option of changing the priority of the options entered by them after the mock allotment.
- The verification Acknowledgement issued to the candidates indicates the category which he / she belongs, rank number for each discipline to which he / she eligible, special category if any etc. It will help in choosing the college or course or place of the college.

The entire process of allotment is controlled by sophisticated software and high end computers which examine minutely the options given by the candidates for allotment of the best possible seat to the candidate as per the rank and options given. Therefore, it is very important that the candidate should be very clear about the choice of the course, college and subject which he is interested in. For example if a candidate is interested only in Master degree Pediatric seats then he can give all the options in all the colleges for allotment of Pediatric seats only. There may be about 38 Medical colleges and the candidates can give 38 options for that course if the course is available in all colleges. The computer will decide the best seat available for allotment as per the rank and order of options of the candidate. Similarly a candidate may be interested only in orthopedics and he may opt for orthopedics course in a particular college as per his choice. The computer will pick up the best options available as per merit and order of options. In other words the candidate is free to give as many options in as many courses in as many colleges as he deems fit. The more number of options the better it is for the candidate to secure a seat of his choice.

NOTE: Candidates are advised not to start entering the options directly on the online option form on the internet without preparatory work at home on choice of options, as it leads to commission of mistakes / wrong entries / wrong order of preferences.

NOTE: Please ensure that whether you are entering the options for Masters Course or Diploma course in the subject of your choice before entering options. Don't repent later.

The candidates are advised to gather information about the colleges, the courses offered, infrastructure available, teaching faculty, laboratory facilities, hostel facilities and any other information which would help him / her in narrowing his options. The distance from his / her house, the mode of transport, the hostel facilities and the environment etc are also prime factors in deciding priority of options.

The whole process of seat allotment hinges on the priority of options entered by the candidate. If option entry is faulty then the candidate stands a chance of losing best available seat as per his rank and category. The candidate is advised to take utmost care while entering priorities for college, course and subject.

Like that the computer will search for the availability of seats for all the options entered by the candidates. The computer will stop searching for allotment of seats once the seat is allotted then the computer will move on to next eligible candidates. Similarly the computer will search for all the candidates based on the merit and options. Like this the computer will reach the last rank till seats are exhausted or till last rank candidate is reached. This entire process is called iteration.

Upon entry of preliminary information by the candidate on the internet at the specified URL, the option entry form will be displayed. (Candidate has to enter his secret key and valid Password.)

The candidate has to first select the discipline in the option entry form. Upon selection of a Medical discipline, the entry form displays the list of Medical colleges and Dental colleges in case of selection of Dental discipline. The candidate has to enter the priority number in front of the displayed college to which they are eligible and interested. That means, first option may be Medical, second option may also be Medical, third option may be Dental, fourth one may be again Medical, fifth option can be Dental, the sixth may be Medical again and so on.

There is no limit for entry of options. A candidate can enter any number of options as he / she wishes to exercise on his / her own priority. Candidates are advised to enter more number of options to avoid the disappointment of not securing a seat. Any candidate has to enter the option in the priority as he / she desires. Candidates are advised to do thorough home assignment regarding the choices which they want to exercise, the college which they prefer, the course which they are interested to join etc. It is better to write the order of options on a sheet of white paper and discuss the same with your parents /

guardians / mentors etc before actually entering same in the system. ONE TIME OPTION ENTRY:

The options entered by the candidate for the first round will remain same for the subsequent round of seat allotment. The candidates will not be allowed to enter options again. Option Entry done before the first round will be the final list of options. The priority of options entered by the candidate will be shown on the option entry module by obtaining the candidate credentials in the subsequent round. Candidate may delete or alter order of higher options. The candidate will be allowed to add new options for any colleges and course that is added to the seat matrix after the first round.

Note: Candidates should compulsorily register using User ID and Secret Key and execute the option entry. If the candidate has either not registered or registered but not executed option entry he/she will not be considered in further process of online seat allotment rounds.

Preparatory work at home:

Allotment of seats depends entirely on the **priority of options** given by the candidates as per the merit / rank. Hence it is of utmost importance to familiarize oneself with the operation of the computer, the locking of seats so that the correct choice and options are entered. Practice of entering of options has to be undertaken as even an expert in computers would require a minimum of half an hour for entry of about 100 options. Familiarity with the computer, prior knowledge of the college, course is essential to fill up options. Even a small mistake in entering the options may deprive a valuable seat in the desired college / course even though he / she is eligible for that seat as per his / her rank. Therefore, KEA suggests that the student should familiarize themselves in entering the options in the online option entry form. A home work of about an hour everyday is necessary for the students to familiarize themselves with the allotment. The following steps may be taken by the candidates before entering their options in the online option entry form.

- The candidate should note the name of the college, the course offered in a separate sheet of paper.
- Preparatory work should be commenced only after asserting their merit / rank order.
- The priority of options among the colleges/courses selected should be noted down.
- A mock allotment on real time data given by the candidates will also be done before the actual commencement of the First-Round allotment, so that the candidate can know the college and course allotted as per his options. The candidate can also change his options after seeing the mock allotment. This will help him to find out his standing as per his merit and as per options. **The mock test is only to help the candidates familiarize and show them the course and college allotted to them and it should be in no way presumed that the same seat and college will be allotted to them in the actual allotment of seats.** Because, the candidates have the option of changing the priority of the options entered by them after the mock allotment.

- The verification Acknowledgement issued to the candidates indicates the category which he / she belongs, rank number he / she eligible, special category if any etc. It will help in choosing the college or course or place of the college.

The entire process of allotment is controlled by sophisticated software and high-end computers which examines minutely the options given by the candidates for allotment of the best possible seat to the candidate as per the rank and options given. Therefore, it is very important that the candidate should be very clear about the choice of the course, college and subject which he is interested in. For example, if a candidate is interested only in Medical seats then he can give all the options in all the colleges for allotment of Medical seats only. There may be about 38 Medical colleges and the candidates can give 38 options in all colleges if interested. The computer will decide the best seat available for allotment as per the rank and order of options of the candidate. Similarly, a candidate may be interested only in Dental and he may opt for Dental college as per his choice. The computer will pick up the best options available as per merit and order of options. In other words, the candidate is free to give as many options in as many courses in as many colleges as he deems fit. The more number of options the better it is for the candidate to secure a seat of his choice.

NOTE: Candidates are advised not to start entering the options directly on the online option form on the internet without preparatory work at home on choice of options, as it leads to commission of mistakes / wrong entries / wrong order of preferences.

NOTE: Please ensure that whether you are entering the options for Medical or Dental course in the college of your choice before entering options. Confirm and then submit / save the entries.

The candidates are advised to gather information about the colleges, the courses offered, infrastructure available, teaching faculty, laboratory facilities, hostel facilities and any other information which would help him / her in narrowing his options. The distance from his / her house, the mode of transport, the hostel facilities and the environment etc are also prime factors in deciding priority of options.

The complete process of seat allotment hinges on the priority of options entered by the candidate. If option entry is faulty then the candidate stands a chance of losing best

available seat as per his rank and category. The candidate is advised to take utmost care while entering priorities for college and course.

Allotment of seats to all the courses as per the seat matrix as notified by the Government.

- (a) Persons with Disability
- (b) NCC candidates
- (c) Sports Candidates

Based on the merit and priority of options the first phase of allotment begins. The computer will first allot the seats in the above-mentioned order and continues in the same order. While allotting the seats in the 1st Phase at any stage, the seat allotted if any, will automatically get cancelled upon allotment of a seat in the subsequent discipline and such cancelled seat will be considered for allotment of a seat in the next iteration.

Therefore, multiple iterations may take place in the 1st Phase. The computer will stop the allotment only if the last seat is allotted or when it reaches the last rank in each course. That means the candidates will always be climbing upwards both in options and in roster. The order of allotment as shown above will get repeated in the 1st phase until there is no change in the allotment of any candidate.

2nd Phase of allotment.

Allotment of seats to all the courses as per the seat matrix as notified by the Government.

(d) Persons with Disability

(e) NCC candidates

(f) Sports Candidates

After allotment of seats in the first phase, action will be taken to allot the seats for the 2nd phase allotment of seats. After completion of the 1st Phase of allotment of seats, the seats that remain unfilled under all the Rural and Kannada medium quota of the reserved categories will be converted to General of the respective reserved categories (SCR & SCK to SCG, STR & STK to STG, 1R & 1K to 1G, 2AR & 2AK to 2AG, 2BR & 2BK to 2BG, 3AR & 3AK to 3AG, 3BR & 3BK to 3BG) before the commencement of 2nd Phase and offered ONLY to the reserved category candidates including GMR & GMK category candidates.

In this phase only reserved category candidates will be considered for allotment and GM candidates will not be considered. Further, GM seats will also be not considered for allotment of seats.

IMPORTANT:

This procedure for conversion of seats will be adopted before the commencement of 2nd Phase of allotment. Further, if the reserved category candidates are allotted with a General Merit / respective reserved category seat during the 2nd phase of allotment, then a reserved category seat becomes vacant. Such seats are treated as '**CONSEQUENTIAL VACANCIES**'. These consequential reserved category vacancies that arise during the 2nd phase of allotment will remain under the same categories and will be offered only to the candidates belonging to the same reserved categories.

NOTE: All GM consequential vacancies which arise in this phase will be considered for allotment in the 3rd Phase of allotment.

Based on the merit and priority of options the second phase of allotment will be done. The computer will first allot the seats as described before. While allotting the seats in the 2nd Phase at any stage, the seat allotted if any, will be released automatically upon allotment of a seat. Such released seat will be considered for allotment of a seat in the next iteration.

Therefore, much iteration may take place in the 2nd Phase also. The computer will stop the allotment only if the last seat is allotted or when it reaches the last rank in each discipline. That means the candidate will always be climbing upwards both in options and roster. The order of allotment as shown above will get repeated in the 2nd Phase until there is no change in the allotment of any candidate.

3rd Phase of Allotment:

Allotment of seats to all the courses as per the seat matrix as notified by the Government.

- (g) Persons with Disability
- (h) NCC candidates
- (i) Sports Candidates

After the allotment of seats in the second phase of allotment, the seats that remain unfilled under various reserved General categories such as SCG, STG, 1G, 2AG, 2BG, 3AG, 3BG, GMR and GMK, along with unfilled special category seats, if any, will be converted to the General Merit category and offered to GM candidates along with all other reserved category candidates in the 3rd Phase of allotment. However, the consequential Rural and Kannada medium reserved category seats that arise during the 3rd Phase of allotment and if remains un-allotted then the same seat will be converted to the General of the respective reserved categories only if there are no seats in the respective general category and will be made available for allotment only to the respective reserved category candidates during 3rd Phase of allotment.

In this round also, the order of seat allotment remains the same. All the candidates will be considered for allotment of seats in this iteration. Before commencement of 3rd

phase the computer will display the number of seats that got allotted in each discipline, total number of candidates allotted and the number of seats that remained unfilled and number of candidates un-allotted.

While allotting the seats in the 3rd Phase at any stage, the seat allotted if any, will be automatically released upon allotment of a seat in subsequent stage and such released seat will be considered for allotment of a seat in the next iteration.

Based on the merit and priority of options the third phase of allotment begins. The computer will first allot the seats in the above-mentioned order and continues in the same order. While allotting the seats in the 3rd Phase at any stage, the seat allotted if any, will be released automatically upon allotment of a seat in the subsequent discipline and such released seat will be considered for allotment of a seat in the next iteration.

Therefore, many iterations may take place in the 3rd Phase also. The computer will stop the allotment only if the last seat is allotted or when it reaches the last rank in each course. That means the candidate will always be climbing upwards both in options and roster. The order of allotment as shown above will get repeated in the 3rd Phase until there is no change in the allotment of any candidate

Speciality of 3rd Phase of allotment is, after completion of last stage of allotment of seats, the seats remained unallotted if any, in any reserved category will be converted to GM automatically and will be offered to all the eligible candidates from 1st to last rank based on the priority of options entered. That means repetition of phase 3 allotment process will take place. Phase 3 allotment stops only when there is no seat in reserved category and no change in the allotment.

Summary:

This illustrates that at each stage, the options are getting shrunk before moving to the next stage if seats are allotted. If seats are not allotted, the options list remains unchanged.

The seats which are returned back to seat matrix in the process of allotment stages will be allotted to the next candidate as per rank and options. This way there will be a number of iterations till the candidate gets the best seat of his choice governed by rank. This means, the system halts allotment when no seats are available for a candidate as per his options.

All the steps taken together as detailed above will form one round and the stages mentioned above, are known as iteration stage / phase. The iteration stage in each round will go on until either the option of the candidate is fulfilled or not. In this way each candidate may get either a Medical seat or Dental seat as per his/her rank and priority in the respective disciplines. However, it is possible that if all seats are exhausted then a candidate might not be allotted a seat at all. Therefore, it is very important to candidates to give their options very carefully and after considerable thought and after discussing with their parents and elders. If by chance the options given by the candidate is not well thought he may lose a seat in a good college as he may not have given option for that particular college or would have given lower options. For example, a candidate is interested in college A, but by mistake or by oversight he has given a lower preference for that college and has given higher preference for some other college. The computer then will allot a seat as per his rank and as per his higher priorities. In this way he may tend to lose a seat in the college of his choice merely because he has not given a correct priority of options.

After the entire iteration of all the discipline in all the three phase is complete the final list will be announced on the website and this is known as the First Round. Therefore, many iterations may take place in one round as per the choice of the candidate and as per the availability of seats. The candidate can track down the movement of seats in the different iteration stages to satisfy himself that the best of the choices is allotted to him. Virtual tracking of the process of allotment by the computer can be viewed by the candidate after allotment. This ensures transparency in the entire allotment stage and KEA is known for its motto **Trust Through Total Transparency**. The final allotted list of the First Round will be hosted on the website, in the Helpline Centers and individual allotment will be sent by SMS, e-mail and the candidates are requested to note the allotment of seats to them in the First Round.

Immediately afterwards, I will login to my Option Entry Log-In-Id and I will report to KEA that I have joined the College.

Further the College Authority will have to login to their College Login-ID and report that the respective candidate has joined the College. If a candidate fails to report back to KEA that he / she has joined, then seat will be cancelled even though they might have physically joined.

Further any candidate who has paid the fees and obtained the Admission Order and fails to report to the College on or before the last date and time specified by KEA in the Admission Order, for such candidates no extension of time will be given and the allotment made in his / her favour shall be treated as Cancelled and he / she has no claim further on such allotment and they will not be considered for allotment of seats in the subsequent round. If higher options get allotted then earlier allotted seat gets cancelled automatically OR if higher options seats are not allotted then earlier allotted seat shall remains in candidates favour.

Implication: Eligible to participate in the subsequent round keeping the seat allotted on hold. However, if a seat in the higher options gets allotted the candidate loses his old seat. There is no choice between the earlier allotted and newly allotted seats.

Important: Fresh options will be permitted only when the new college / courses which are included in the seat matrix after the allotment of first round only for that newly added college / course.

Choice3: I am not satisfied with allotted seat but wish to participate in the next round with all the already entered options except the allotted options by surrendering the allotted seat and also re-ordering of already entered options.

Implication: Eligible to participate in the subsequent round by rejecting the allotted seat.

NOTE: Chances of getting the lower order options is subject to availability of seats as the other candidates next to your rank might have entered those options and seats would be allotted to them based on merit.

Implication: Not eligible to participate in the subsequent round no hold on the allotted seat and seat allotted earlier will get cancelled.

NOTE: If a candidate fails to exercise any of the above 4 choices within the stipulated date and time then the seat allotted to such candidate stands cancelled automatically without any further notice in this regard and he/she will not be allowed to participate in further rounds.

Candidates should be very cautious while filling Option Entries:

All the PG Medical/Dental aspirants are informed to remember the following important points while entering the Options/Priorities of courses and colleges for seat selection to PG admission.

- All PG Medical/Dental seats are classified into four types as given below
 - Government seats in Government colleges as well as private colleges – Govt (G)
 - Private quota Seats in Private colleges - Private(P),
 - Non Resident Indian seats - NRI -(N)
 - Others seats - Other(Q)
- All the seats are notified with six characters as given below

M	1	7	G	C	1
---	---	---	---	---	---

From Left to right

M – Medical

17 – College Code

G – Government seat

C1 – Subject Code

G – Government seat

C2 – Subject Code

- The above mentioned seat notification code would be displayed with fees details during the Option entry after login to system based on the eligibility of the each candidate
- The Seat allotment logic/module/system follows the Category, NEET Rank of the candidate along with the entered options and priorities given by the candidate during options entry
- Assume that a candidate is eligible under for G & GMP seats, then, he/she would be eligible to enter options related to G-Seats, P-Seats and Q-Seats of all colleges
- If he/she entered Options with the priorities as given below, then the system would check the seat availability as per the options & priorities and allot the seat if it is available at that point in time [as explained below]

Options Priority No.

M17PC1 - 01

M17QC1 - 02

M17GC1 - 03

M17GC2 - 04

In the above scenario, the system would check the seat availability for the above four options one by one starting from the priority No. 1 to 4 in order and would allot seat based on the availability. Assume that the candidate is having required merit/rank to avail any seat of the above four options including the G-Seats of option/priority no. 3 or 4, where the fees is lower as compare to the P-Seat/Q-Seat. The system would allot seat only against option/priority No. 01 as seat is available as per his/her merit/rank and he/she has not given G-Seats in the top. Therefore, all the candidates are informed to be very cautious while filling option entries & priority as there is no provision to change the seat in the later stage once seat is allotted.

The allotment will be based on merit, priority of options entered by the candidate and roster prescribed by the Government.

The allotment of seats will be conducted in two rounds and each round consists of three phases and each phase consists of number of iterations.

1. First Round.
2. Second Round.
3. Mop-up Round

12.1 Order of online seat allotment in first round:

Eligible candidates of Persons with benchmark Disability will be considered first followed by In-service candidates and then by Non in-service candidates.

12.2 Procedure for allotment of seats in Medical / Dental Discipline:

The computer starts with allotment of seats to rank number 1 in Medical discipline. The computer first checks the availability of seats for the First option entered by the candidate with Rank no 1. Obviously the candidate will get the seat as per his options. Whereas for the next rank holders the computer check the availability of seats for the first option, if seat is available it will allot or if the seat is not available then the computer will search for the next option. Like that the computer will search for the availability of seats for all the options entered by the candidates. The computer will stop searching for allotment of seats once the seat is allotted then the computer will move on to next eligible candidates. Similarly the computer will search for all the candidates based on the merit and options. Like this the computer will reach the last rank till seats are exhausted or till last rank candidate is reached. This entire process is called iteration.

12.3 Seat Allotment Logic:

Based on the seat matrix issued by the Government, action will be taken to allot the seats to the candidates based on their eligibility and reservation criteria. The options entered by the candidate will be considered for allotment based on the merit. While allotting the seats to the candidates, the computer will check the availability of seats for each option based on the priority of options. The order of allotment / reservation for each of the category is detailed below for the information of the candidates.

The allotment of seat for a particular candidate is based on his/her rank and priority option entered. In any category, the candidate option is searched in general category (GM) and allotted, if no seat is available in GM category the computer searches in Hyderabad Karnataka GM quota (GMH) and allots the seat. If seat is not available either in GM or GMH then it follows the priority order as shown above. This improves the category of seat allotted to roster. In the same manner all the categories improved as per roster for candidates claiming reservation.
